

# TenaFe Insight

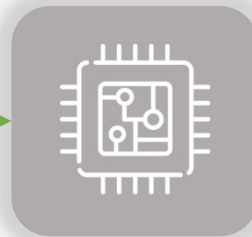

## Single Development Build & Run Platform

Data Center  
OEM Server Storage

### TenaFe TC2310

PCIe® Gen5 NVMe™  
SSD Controller

### TenaFe Insight

Single Development  
Build & Run Platform

### SSD Solution

Your Ideal  
Customized SSD

### Overview

TenaFe Insight is a single development build and run platform to enable data center and server storage SSD customization at the convenience of development on-site or in the cloud.

TenaFe Insight provides the ability to contrive innovative, efficient and organized technologies with an accelerated time to market.

### Key Advantages

- **Breakthrough Technology.** Ingenious tools to simplify SSD development with TenaFe Controllers through TenaFe Insight.
- **First-of-its-kind.** The earliest all-in-one tool designated for efficient engineering collaborations from design, development, qualification to failure analysis.
- **Time-to-Market.** Eliminates the back-and-forth regime between TenaFe and co-development partners, to accelerate your time to market.
- **Fully Versatile.** Flexibility in your hands. Design, develop and deploy anywhere in the cloud or on site.
- **Intuitive.** Supported with transparent, systematic resources and documentation, so anyone can master and use TenaFe Insight.

- First in Market
- SSD Development Simplified
- Accelerates Time to Production
